

Samples of water exposed to precursors (prototyping) of the quantum nano-layers created by Dr. Lakicevic

‘As pioneer of the New Energy physics, in 2006 I successfully demonstrated transformation of the quality (degree of centeredness) of the microwave radiation of a cell-phone using a self-created multilayered structure without any electronic components (ie: nano-layer foils) in the form of a holographic device. This new phenomenon which I call ‘Wave Field Centeredness’ (WFC) has been certified by the Hado Life Institute of the renowned Dr. Masaru Emoto.’ (photographed here)

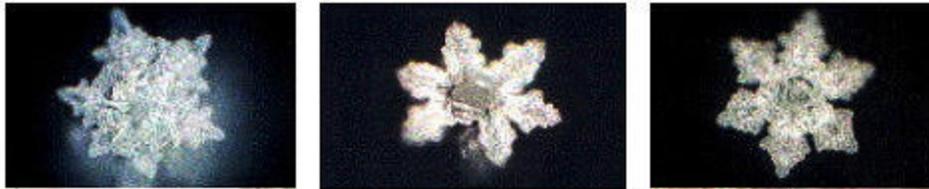

The test procedure of the final product has been carried out in three following steps:

- **First**, a water sample is taken and its crystal structure recorded by application of Masaru Emoto’s technique. The result is shown in **Sample 3** from which it is obvious that the chosen water itself was unbalanced, since it originated from the mountain where a high content of heavy metals lead and zink has been documented.
- **Second**, an another sample of the water from the same source has been irradiated by the microwave radiation of a radiating device for the

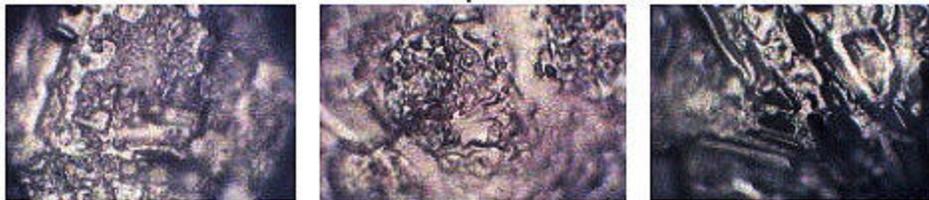

time of five minutes and its crystal structure recorded by application of the Masaru Emoto's technique. The result is shown in **Sample 2** from which it is obvious that the degree of imbalance in this case is much higher than in the first case, as a logical consequence of the acting of the imbalanced microwaves.

- **Third**, a new sample of the water from the same source has been treated as in the second case with the only difference that the nano-layer was pasted on the radiating device itself. The result is shown in **Sample 1** from which it is obvious that the water has become balanced, what is reflected in its crystal structure which is turned into hexagonal form, similar to a snow-flake, what is the **final and indisputable proof that the method developed was working excellent and that the final product is not only preventing all possible hazardous effects of the microwave radiation of the radiating devices, but also is bringing already unbalanced living cells back into perfect balance.**

Sample 3

1)An expert and layman can easily see the visible changes the real BioShield device produces. Here is an excerpt from the complete double blind placebo study (full study will be published soon), from which a substantial summary is already available under the following reference:
